

Pap Smear

2016 RSR Instruction Manual:

Required for HIV-positive clients with service visits in the following categories:

Outpatient/ambulatory medical care services

XML Variable Name:

ReceivedCervicalPapSmearID

Description:

Reported for HIV-Positive women only, only report a value for a cervical smear. Do not report a value for an anal test for males or female clients. A Pap smear or screening is a way to examine cells taken from a woman’s cervix. It can detect cell changes that may be pre-cancerous as well as hidden small tumors that may lead to cervical cancer.

Did the client receive a Pap smear during this reporting period?

- **Yes**-See Section A
- **No**-No data entry or blank field-See Section A
- **Not Medically Indicated**-See Section B
- **Not Applicable**- See Section B

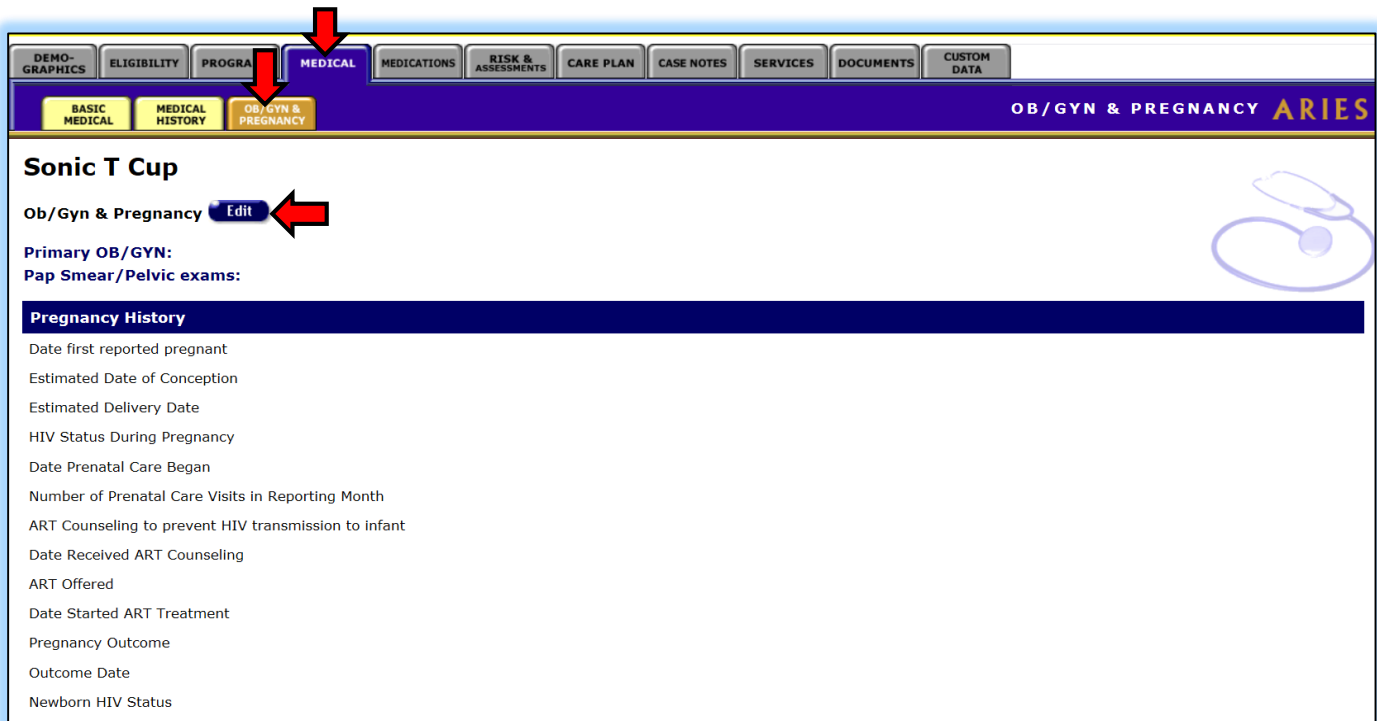

ARIES

There are two sections in ARIES to consider when capturing a Pap smear.

- A. **Medical tab-OB/GYN & Pregnancy subtab**
- B. **Custom Data tab**

A. Medical Tab-OB/GYN & Pregnancy Subtab:

1. After logging in to ARIES, select the desired client/patient and click on the “**Medical**” tab.
2. Next, select the “**OB/GYN & Pregnancy**” subtab.
3. Click on the “**Edit**” button.

4. After clicking “Edit” you will see the screen below. To enter a Pap Smear & Pelvic Exam Date and Result click on “New”.

B. Custom Data-Pap Smear NMI and N\A

1. There are two new sections in the **Custom Data** tab. They were created in order to capture Female Pap Smear data elements “**Not Medically Indicated**” and/or “**Not Applicable**”.
2. Locate these new sections labeled, “2017 RSR-Pap Smear NMI” and “2017 RSR-Pap Smear NA” as seen below.
3. You can enter a date in the mm/dd/yyyy format for either section by clicking on the “New” button for either data element.

The screenshot shows the Sonic T Cup Custom Data interface. At the top, there is a navigation bar with options: < Back, Home, Find, New, Reports, Shortcuts, Help, Logout. Below this is a yellow header with the text '***OLD*** TEST' repeated four times. A menu bar contains buttons for DEMO-GRAPHICS, ELIGIBILITY, PROGRAMS, MEDICAL, MEDICATIONS, RISK & ASSESSMENTS, CARE PLAN, CASE NOTES, SERVICES, DOCUMENTS, and CUSTOM DATA. The CUSTOM DATA button is highlighted. Below the menu bar is a purple banner with 'CUSTOM DATA ARIES'. The main content area is titled 'Sonic T Cup' and 'Custom Data'. It contains two sections: '2017 RSR - Pap Smear NA' with a 'New' button (highlighted with a red arrow) and a button labeled 'Not Applicable (N/A) for Pap Smear'; and '2017 RSR - Pap Smear (NMI)' with a 'New' button (highlighted with a red arrow) and a button labeled 'Pap Smear Not Medically Indicated (NMI)'. There is also an image of a gynecological speculum on the right side of the page.

4. The user may enter a date in the **mm/dd/yyyy** format either by using the calendar icon or by entering a date manually.

The first screenshot shows the 'Sonic T Cup Custom Data Edit' form for '2017 RSR - Pap Smear NA'. The text 'Not Applicable (N/A) for Pap Smear' is highlighted with a red box. To the right is a date input field containing '6/15/2017' with a calendar icon. Below the date field are 'Save' and 'Cancel' buttons.

The second screenshot shows the 'Sonic T Cup Custom Data Edit' form for '2017 RSR - Pap Smear (NMI)'. The text 'Pap Smear Not Medically Indicated (NMI)' is highlighted with a red box. To the right is a date input field containing '6/15/2017' with a calendar icon. Below the date field are 'Save' and 'Cancel' buttons.

5. After selecting the specimen “Date of Collection”, click on “**Save**” to save your data. The read only screen will show the following results and will count as a “Yes” for Pap Smear NMI and “Yes” for Pap Smear NA respectively for the 2017 RSR.
Note: The results seen below are *only an example* to show how to enter dates for these data elements. This is not an actual representation the client was deemed NMI for a Pap Smear test on 10/15/2017 then later deemed N/A on 12/15/2017.
